
ARTEFACT 4

Name:

GradReady Interactive Prototype

Type:

Interactive Figma Prototype

Description:

This is the complete clickable GradReady student experience, covering the journey from the landing page through the final student portfolio experience.

The prototype demonstrates:

- onboarding
- student setup
- weekly project logging
- AI-assisted portfolio generation
- reviewing/editing generated content
- portfolio creation
- the complete student product journey

Prototype Link:

<https://www.figma.com/proto/XaJmdnlpSNmXHv3LgXZGLC/GradReady-Product-Design-and-Prototype?node-id=0-1&t=jvUxQbjJse8udwkz-1>

IMPORTANT:

This is an interactive prototype, not just a static image.

Portfolio placement:

Place this toward the end of the GradReady case study after the user flow and high-fidelity screens.

Preferred presentation:

Primary:

Create a polished “Explore the Interactive Prototype” CTA.

The button should:

- open the Figma prototype in a new tab
- use rel="noopener noreferrer"
- clearly indicate that it opens an interactive prototype

If a reliable responsive Figma embed can be implemented without hurting page performance or mobile usability, an embed may be used.

However, do NOT force an iframe if it creates:

- poor responsiveness
- loading issues
- permission errors
- excessive page height
- bad mobile experience

A premium prototype preview card + external CTA is preferred over a broken or awkward embed.

Use one of the exported Figma screens as the prototype preview image.

Do not alter the actual prototype.
