

PRODUCT MANAGEMENT ASSIGNMENT 4 (PRODUCT IDEA WIREFRAME SKETCH ON MIRO, DESIGN AND PROTOTYPE ON FIGMA)

1. [MIRO BOARD LINK](#)
2. [FIGMA DESIGN LINK](#)
3. [PROTOTYPE LINK](#)

Problem Statement:

Food businesses such as restaurants, bakeries, supermarkets, and market vendors frequently dispose of unsold food that remains safe for consumption because it cannot be sold before closing time or expiry.

This results in financial losses for businesses and increased food waste, while many consumers continue to seek affordable food options.

There is currently no simple platform that efficiently connects businesses with consumers willing to purchase these products at discounted prices.

Solution Statement:

FoodSaver is a mobile marketplace that enables food businesses to list surplus and near-expiry food products at discounted prices.

Consumers can browse available deals, reserve food items, complete payment, and collect their purchases before expiration.

This creates value for both businesses and consumers while reducing food waste.

Business Goal

Help food businesses recover revenue from unsold food inventory.

User Goal

Help consumers discover and purchase quality food at discounted prices.

Environmental Goal

Reduce food waste and promote sustainability.

Product Target Users

Primary User 1: Consumer

Name: Sarah

Age: 27

Occupation: Graduate Student

Goals:

1. Save money on food
2. Discover affordable meals nearby
3. Purchase food quickly

Pain Points

1. Food is expensive
2. Limited budget
3. Doesn't know where to find discounted food

Primary User 2: Food Business Owner

Name: Mr. Ade

Age: 42

Occupation: Restaurant Owner

Goals

1. Sell surplus food
2. Reduce losses

3. Attract new customers

Pain Points

1. Unsold food at closing time
2. Food waste
3. Revenue loss

FoodSaver MVP Features

1. User Registration:

Allows new users to create an account using:

1. Email address
2. Phone number

2. User Verification:

Allows users to verify their account through:

1. Email verification code
2. Phone OTP verification

3. User Authentication:

Allows existing users to:

1. Log in with email
2. Log in with phone number
3. Reset forgotten passwords

4. Browse Food Deals:

Allows users to:

1. View available discounted food offers
2. Search food listings
3. Browse nearby deals

5. View Food Details

Allows users to view:

1. Food name
2. Description
3. Original price
4. Discounted price
5. Pickup deadline
6. Seller information

6. Reserve Food

Allows users to:

1. Select food items
2. Reserve available quantities
3. Proceed to checkout

7. Secure Payment

Allows users to:

1. Pay for reserved food
2. Complete transactions within the app

8. Order Confirmation & Pickup Information

Allows users to:

1. Receive order confirmation

2. View pickup location
3. View pickup time
4. Access collection details
